

Northern Arizona University - Forestry Club

ANOTHER YEAR

A year is, of course, lots more than a sum total of collected photographs. 1969 was no exception from the summer campers with their "rubber tired skidders," to the all-important accreditation, to a "barbecue" with some surprisingly lively freshmen, to the last grinding week of finals.

If this annual serves to rekindle such memories, perhaps many years from now, then it has well accomplished its goal.

Dedication

This year we dedicate the "ANNUAL YIELD" to Dr. William P. Thompson

Doctor "T" came to N.A.U., then A.S.C., in 1961 from Duke University. Since then he has become an integral part of the N.A.U. Forestry School. His cheery smile and warm personality help keep the school up and on the move.

From Freshman Orientation to Summer Camp to Forest Economics, Dr. Thompson lends his experience and knowledge to make our forestry education just a little better than the next forestry school.

DEAN'S REPORT

Of course, the greatest item to report this year is accreditation by the Society of American Foresters. This has been a team effort, and we want to thank everyone who has been involved.

We were fortunate this year to add to the staff Dr. T. E. Avery, author of two well-known texts in forestry. Gene is a great individual and fine member of our faculty.

The formation this year of the N.A.U. Forestry Alumni Council marks another milestone, and another first for forestry. Any of you alums who didn't make the homecoming reunion missed a great time. Try harder next year!

A new endeavor this year is an intensive study of a possible new, unstructured curriculum. We are not ready to announce this as any definite development, but it certainly has caused us to carefully examine every facet of forestry education.

Arizona's Eternal Triangle

Trees, paper, lumber! Today this trio is as much a part of Arizona's thriving economy as her abundant sunshine. Give thanks for the bountiful and beautiful forest to excellent forest management by federal and state agencies, to conservationists, and to private industry . . . all of whom are dedicated to multiple use of the forest. Southwest is proud to be a partner in the conservation of our heritage through selective harvesting and full utilization of our forest resources.

KAIBAB INDUSTRIES is among the top thirty lumber producing organizations in the United States. We produce annually 150 million board feet from production centers in Colorado, Utah and Arizona, with sales coverage from coast to coast.

At Kaibab, the lumberman is a master of his craft. He is trained in conservation practices and is keenly aware of his responsibilities to the forest and to future generations of lumber users. He is truly a tree farmer who tends his crop as carefully as would any of his fellow agriculturists.

These qualities assure the customer a final product of constant quality and texture.
