

How to: **CLEAN YOUR REFRIGERATOR** *the right way*

Clean

- Take out all food, etc.
- Remove any stickers placed on the fridge. Please leave magnets with repair info on fridge.

- Clean the inside and outside of the refrigerator with a mild detergent and soft sponge.

DO NOT use any sharp objects for cleaning, doing so may puncture parts that are expensive or may require a refrigerator replacement (you'll be charged for damages)

- Leave **door closed** & the refrigerator **plugged in**.
